SUMMARY

Computer Science graduate and full-stack developer with hands-on experience building and deploying web applications, AI agents, and workflow automation systems. Work spans frontend, backend, databases, and third-party API orchestration, with LLMs and AI agents integrated into practical, production-oriented apps. Winner, CWA Ship Hackathon 2026.

EDUCATION

BS Computer Science | GPA: 3.4 / 4.0

July 2026

DHA Suffa University (DSU), Karachi, Pakistan

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C, HTML5, CSS3

Frontend: React 18, Next.js, React Native, Tailwind CSS, shadcn/ui, Vite

Backend & Data: Node.js, Express.js, FastAPI, REST APIs, Supabase (PostgreSQL + Edge Functions), MongoDB, MySQL, Firebase

AI & Automation: LLM Integration, RAG, MCP, LangGraph, Retell AI, n8n, Gemini, GPT, Claude, ElevenLabs

Tools: Git/GitHub, Vercel

PROJECTS

Sudhaar AI — Civic Issue Routing Agent | Team project, CWA Ship Hackathon 2026

(Winner)

Live · GitHub

Next.js 16 · React 19 · TypeScript · Tailwind · Supabase · FastAPI · LangGraph · Gemini

- LangGraph + Gemini pipeline classifies citizen reports, routes them to the responsible authority, and drafts complaints in English or Urdu; built the authority dashboard with area-scoped access and AI-verified fix proof.

Assigntist.io — Meetings-to-Tasks Platform | Final Year Project

Live · GitHub

React 18 · Vite · Tailwind · Supabase · n8n · MCP · Trello API · Vexa

- A bot joins live meetings, captures transcripts, and extracts action items with Gemini, then pushes tasks to Trello through a custom-forked MCP server (28 tools); Google Calendar triggers keep meetings synced.

iDesk — AI Voice IT Helpdesk Agent

Live · GitHub

React 18 · Vite · Node.js/Express · Retell AI · GPT-4.1 Nano · n8n · Vercel

- Voice agent that triages IT issues through conversation, attempts fixes, and schedules callbacks; a post-call n8n pipeline logs tickets to Google Sheets and sends Gmail confirmations.

HomeMaid — Domestic Worker Marketplace | Team project, AISeekho Google Antigravity Hackathon

GitHub

React Native · Expo · Node.js/Express · Supabase + PostGIS · Gemini 2.0 Flash · Google Maps

- Two-sided marketplace where a Gemini agent parses voice or text requests and matches nearby maids via PostGIS queries, with real-time bidding over Supabase Realtime.

Marketeer AI — Meta Ad Campaign Generator

GitHub

React · TypeScript · Vite · shadcn/ui · Supabase · Google Gemini · Tailwind CSS

- Generates complete Facebook and Instagram ad campaigns (targeting, budget allocation, creative direction), with Gemini logic running in Supabase Edge Functions.

ACHIEVEMENTS & LEADERSHIP

- Winner** — CWA Ship Hackathon 2026 (built Sudhaar AI) 2026
- Top 10** — Build with AI Hackathon, GDG Kolachi (Marketeer AI) 2025
- Participant** — AI Seekho Google Antigravity Hackathon (HomeMaid) 2026
- Participant** — APAC Solution Challenge, Google Developer Groups · Certificate 2025
- Marketing Lead** — GDG on Campus, DSU: ran social media, email, and event campaigns 2024 – 2026
